4D ULTRASOUND

We are pleased to provide our obstetric patients with the latest in ultrasound technology. The Samsung ultrasound system uses real-time, 4D ultrasound technology to capture images of your baby that appear much like real photographs.

While insurance will not provide reimbursement for the 4D photographic session, we do allow our patients to schedule special sessions with the ultrasound technologist for this purpose. This photographic session is best scheduled between the 28th and 32nd week of your pregnancy. The cost of the session will be \$150. Please let the front scheduling desk know if you would like to schedule a 4D ultrasound.

DISABILITY and/or FAMILY MEDICAL LEAVE FORMS

Please note that the charge for completing all Disability and Family Medical Leave Forms will be \$20.00 per form. Payment is expected at the time the completed forms are picked up. **Please notify us of how long you plan to be absent from work.** Allow at least seven business days for completion of forms.
