

SPARKS & FAVOR, P.C.

One of our physicians is always available for urgent problems related to your pregnancy. We do not share call with physicians outside of our group.

Please call us for...

- Fever above 101.5
- Cramping (more than just mild discomfort) or bleeding. Any bleeding during second or third trimester
- Significant abdominal pain or severe headache
- Difficulty breathing or shortness of breath that seems to be getting worse
- Nausea and vomiting not improved by following “Morning-Sickness Tips.” Especially call us if you are unable to tolerate liquids. Severe diarrhea.
- Fainting or persistent dizziness
- Blurred vision or sudden changes in your vision
- Tender or swollen leg. One leg swollen more than the other.
- Accident or injury
- A change in any previous medical problem or prescribed medication (asthma, diabetes, hypertension, etc.)
- Leaking of fluid from the vagina
- Signs of premature labor (before 37 weeks)
 - Regular cramping, tightening or pain in lower abdomen or back
 - Pressure in the lower pelvis or vagina
- Pain, burning, or difficulty urinating
- Noticeable change or decrease in baby’s movement after 26 weeks. See handout on counting fetal movements

You can reach the on-call physician after hours at 205.397.1286 or 205.930.4038
